

### DR JOANNE O'RIORDAN

BDS NUI, PG Dip Imp Dent (U War)

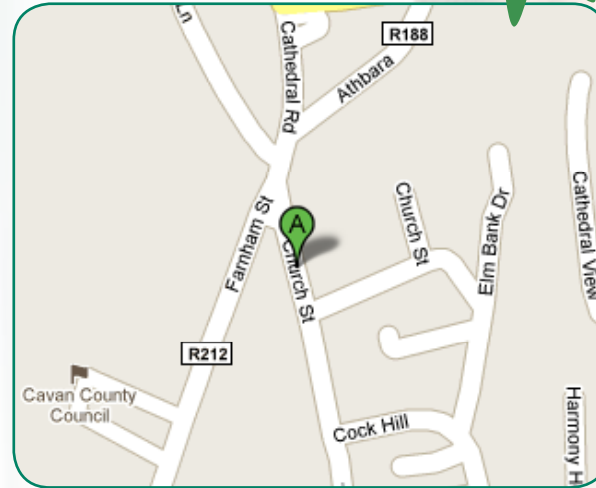

Joanne qualified as a Dental Surgeon from University College Cork and established the Church Street Dental & Implant Clinic located in Cavan in February 2000.

She has a particular interest in Dental Implants, having recently received a Postgraduate Diploma in Implant Dentistry from the University of Warwick and has been placing Implants since 2003. With her extensive training in Implant Surgery, she is specifically qualified for the safe placement of dental implants and implant restoration.

She is currently completing a Diploma in Conscious Sedation in Trinity College Dublin. From her vast experience as a dental surgeon, Joanne is aware that the barriers created by dental phobias are easily elevated by intravenous and "happy air" conscious sedation techniques.

To keep up to date with current developments within the dental field, Joanne attends regular courses and lectures around the UK and Europe.

& implant clinic

## DENTAL IMPLANTS

Implants are the only truly long-term solution to tooth loss, they prevent the need for dentures which can be uncomfortable to wear, and they solve the damage to teeth that bridges can cause.

Secure and comfortable, implants look, feel and function like real teeth. Once fitted, they are permanent and you won't have any hot or cold sensitivity from them.

Dental implants provide a wonderful, realistic cosmetic result, which totally blend in with your natural teeth.

## CAN I HAVE IMPLANTS?

You are a candidate for a dental implant if you:

- are missing one or more teeth
- have decayed or failing teeth
- require a root canal
- have failing crowns or bridges
- use loose or uncomfortable dentures
- need to secure a denture

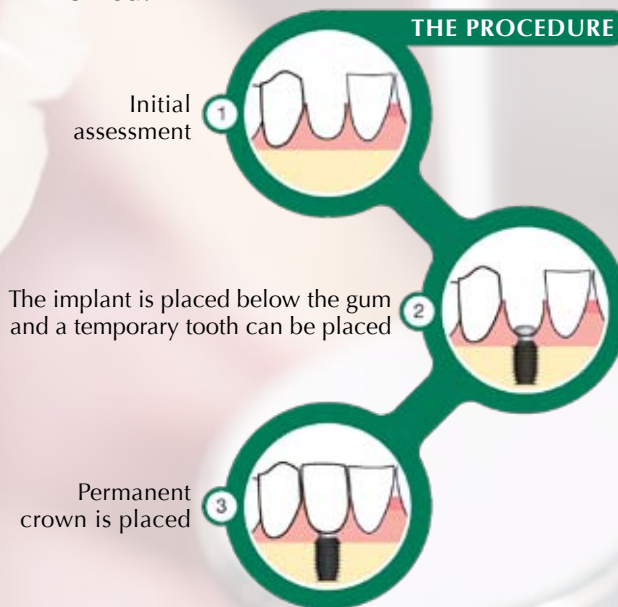

## EASY TO LOOK AFTER

Just maintain the same way as you do your other teeth, with daily brushing and flossing.

## ASSESSMENTS AND TREATMENT PLAN

Joanne will carry out a thorough assessment, determine what you want and discuss your options. You will be given a detailed treatment plan and have as much time as you need to ask questions and consider what is involved.

### THE PROCEDURE

## IMPLANT PLACEMENT

A titanium post is placed under the gum as a very strong replacement for your natural tooth root. We provide you with a temporary tooth whilst the implant integrates with the jaw bone (this usually takes about 12 weeks).

## PERMANENT CROWNING OF THE IMPLANT

The permanent crown is carefully crafted to look and feel like a healthy, natural tooth that perfectly matches your own.

## THE IMPLANT CLINIC

A state of the art dental practice dedicated to providing high quality cost effective dental implant treatment.

## PROFESSIONAL SERVICE

Your implant team will take the utmost care not only in your treatment, but also in the explanation of the procedures involved and the way you are treated. We take care to understand your feelings and needs to ensure that you are completely confident with the procedure and totally satisfied with the final outcome.

## A SPECIALISED TREATMENT

A dedicated team of specially trained dentists, nurses and technicians.

- explain fully all your options & procedures
- compile a personalised treatment plan
- use the most advanced techniques and materials
- provide a quality, affordable service

## TESTIMONIALS:

*"I had lost a front tooth playing sport, and an implant was the only real solution. Joanne and her team were excellent from start to finish. The tooth is indistinguishable from my other teeth. I'm really pleased with the result." - D Higgins*

*"I feel so much more confident in my appearance now with the new tooth. I was very self-conscious of my broken tooth beforehand. Now my smile is better now than it's ever been. Church Street Clinic were brilliant through the whole process." - K Brady.*
